

EXCEL PENETRATOR

Are you ripping your Country deep enough?

- Side buster / centre buster with gassing and fertiliser applications
- Large heavy duty rings for breaking clods from the top to the bottom of the furrow
- Minimum draft shank design promoting trash flow and reducing horsepower requirements saving you in fuel costs.
- 5/8 In-Line Shear Bolt and Clamp Assembly will not spread or holes elongate after prolonged use. The shear bolt is easy to replace, delivers a higher breakout pressure than conventional shear pin arrangements at a much cheaper replacement price.
- All Bolted connections using 1" Grade 8 bolts (no u-bolts) saving money as costly u-bolts have a tendency to break in primary tillage operations. The Bolts also stop clamps from twisting and moving while giving the added benefit of quick and simple Tyne relocation.
- Tough robust construction using Bisalloy steel.
- Category 3 & 4 Linkage.
- Excellent Trash Incorporation.

Put a Excel Penetrator to work on your farm today...

+ **4row - 8row Convertible**
6row - 12row Convertible

+ **Unique one handed tyre adjustment**

+ **Massive 930mm of trash clearance**

"We have had our Penetrator for 7 years and have used it for a number of operations in that time; I give it the four "T's" its TOUGH, TROUBLE- FREE, TIMESAVING and a must to have in the TOOLYARD."
